ABSTRACT

A summary of information obtained from special runs of the 1970 U.S. Census of Population computer summary tapes is reported. This information includes, for each Census County Division within each Oregon county, population by racial group, family income distribution of racial groups, and poverty statistics. The original impetus for compilation of the data arose from requirements dealing with meeting nondiscriminatory legal standards. The findings, which are reported in tabular form, indicate that about 4 1/2% of Oregon's population is classified as minority. Of a total population of 2,091,385, 34,577 are Spanish Language, 26,308 are Black, and 13,510 are American Indian. The "Other" category, 19,488 persons, is largely composed of Japanese and Chinese. These minority populations are concentrated in the metropolitan areas of Oregon, principally around Portland. The Willamette Valley (location of the state's 3 metropolitan areas) is the home of 67% of the state's Spanish Language population, 46% of the Indians, and 93% of the Black residents of Oregon. Minority family incomes tend to be lower than those of Caucasians, although middle income levels contain relatively large percentages of families in all racial groups. Minority groups do have proportionately fewer in the higher income class, however, and more in the lower classes. (Author/HBC)

# INCOME AND POVERTY DATA FOR RACIAL GROUPS

## A Compilation for Oregon Census County Divisions

### Abstract

This report summarizes information obtained from special runs of the 1970 U.S. Census of Population computer summary tapes. This information includes for each Census County Division within each Oregon county, population by racial group, family income distribution of racial groups, and poverty statistics. The requirements of Affirmative Action Plans provided the original impetus for compilation of the data. An affirmative action plan deals with meeting nondiscriminatory legal standards.

Generally recognized are the distinctions among racial groups in terms of income and poverty. These distinctions acquire added dimension and character when geographic detail is added. Census County Divisions in many instances are not mirror images of the overall county with respect to distribution of racial groups and income status.

### Summary

About four and one-half percent of Oregon's population is classified as minority in the 1970 Census of Population for Oregon. Of a total population of 2,091,385, 34,577 are Spanish Language, 26,308 are Black, and 13,510 are American Indian (Table A). The "Other" category, 19,488 persons, is largely composed of Japanese and Chinese.

As indicated in tables to follow, these minority populations are concentrated in the metropolitan areas of Oregon, principally around Portland. The Willamette Valley (location of the state's 3 metropolitan areas) is the home of two-thirds of the state's Spanish Language population, 46 percent of the Indians, and 93 percent of the Black residents of Oregon.

Minority family incomes tend to be lower than those of Caucasian (Table B). Middle income levels contain relatively large percentages of families in all racial groups. Minority groups, however, have proportionately fewer in the higher income class, and more in the lower classes.

---

Prepared by Gary Valde and Robert O. Coppedge, Research Assistant and Extension Economist, respectively.

Nearly a third (32 percent) of all families receive incomes in excess of $12,000. Nearly 23 percent of Spanish Language families, 19 percent of Black families and 25 percent of families of other racial minorities receive incomes in excess of $12,000.

Table A. Number of Persons by Racial Group, Oregon, 1970

| Racial group | Number of persons | Percent |
|---|---|---|
| Caucasian..... | 1,997,542 | 95.51 |
| Spanish Language..... | 34,537 | 1.65 |
| Black..... | 26,308 | 1.26 |
| American Indian..... | 13,510 | 0.65 |
| Other..... | 19,488 | 0.93 |
| Total..... | 2,091,385 | 100.00 |

SOURCE: 1970 Census of Population for Oregon.

Poverty level figures, as determined by Federal definitions, indicate over 8 percent of Oregon's families live in poverty (Table C). Caucasian families are in relatively favorable circumstances compared to minority racial groups, where up to 22 percent of the families may exist in poverty circumstances.

Table C. Families below Poverty Level, Oregon, 1970

| Racial group | Total number of families | Families below poverty level | |
|---|---|---|---|
| | | number | percent |
| Caucasian..... | ~~523,825~~ 524,104 | 42,960 | 8.20 |
| Spanish Language.... | ~~7,337~~ 7,052 | ~~1,208~~ 1,225 | ~~16.46~~ 17.37 |
| Black..... | ~~5,529~~ 5,399 | ~~1,220~~ 1,203 | ~~22.06~~ 22.28 |
| Other..... | ~~5,792~~ 5,928 | 1,068 | ~~17.75~~ 18.02 |
| Total..... | 542,483 | 46,456 | 8.56 |

SOURCE: 1970 Census of Population for Oregon.

There are exceptions, however, to the tendency for minority family incomes to fall below Caucasian family incomes, both at sub-county and county levels. Black family mean incomes exceed those of Caucasians in three Oregon counties, Clatsop, Douglas, and Wasco. Families comprising the "Other" racial category have greater mean incomes than Caucasians in Hood River, Deschutes, Grant, and Malheur counties. Families of Spanish Language have higher mean incomes than Caucasians in Clatsop, Lincoln, Jefferson, Morrow, Baker, and Wallowa counties. In Clatsop county, for example, the mean family incomes for Spanish, Blacks, and Caucasians are $15,409, $14,629, and $10,317 respectively. There are no Spanish or Black families below the poverty level in Clatsop County although 625 Caucasian families fall into this category.

Wide variation also exists among counties in the composition of the population below the poverty level. In several counties most individuals below the poverty level are 65 years old or over but in others a majority are under 65 and receiving earnings.

For instance, Benton County has 3,409 individuals under 65 years of age and 406 individuals 65 or older below the poverty level. Sherman County, on the other hand, has 8 individuals under 65 and 78 that are 65 or over below the poverty level. In some counties, such as Clatsop and Crook, there are disproportionately large numbers of Caucasian families and small numbers of Spanish Language families below the poverty level.

Therefore, the relationship between Caucasian and minority race incomes is by no means uniform in all instances throughout the state.

Definitions

Race: As the 1970 Census of Population was a mail-out, mail-back questionnaire, answers to questions are based on the respondent's own evaluation of his situation. For example, race as reported in the Census is dependent upon what the respondent felt his race was, rather than any scientific definition of biological stock.

Perhaps the most elusive category is "Spanish". In this report the identifying factor for people of Spanish background or Spanish race is persons of Spanish Language. The Census categorizes people as being of Spanish Language if Spanish is their mother tongue; that is, if Spanish was spoken in their home during their youth. Other persons in the household are counted as persons of Spanish Language if the head of the family or the wife reported Spanish as his or her mother tongue.

In previous Censuses people of Spanish descent or Spanish origin were classified separately from the "white" category. In the 1970 Census of Population, the white category includes persons of Spanish Language. Where persons of Spanish Language have been deleted from white, the term "Caucasian" is used. Since some persons of Spanish Language are not, in fact, white, this procedure leads to a slight understatement of the number of Caucasians and over-estimate of Blacks and "other" races.

For instance, in Multnomah County there are 376 Blacks and 253 members of "other" races who are of Spanish Language.

The "other races" category used in this publication includes persons of Japanese, Chinese, Filipino, Hawaiian, Korean, Aleut, Eskimo, Malayan, Polynesian, and other races.

Residence: Persons away from the state for an extended period of time (in the Armed Forces, studying in foreign universities, etc.) and citizens of other countries but living in Oregon are not counted as residents of the state.

Income: Income data contained in this report are for the calendar year 1969. Other characteristics are as of April 1970. Income is defined as the number of dollars received before deductions for personal income taxes, social security, and other miscellaneous items.

Family income is income received by all members of the family unit, including husband, wife, and children over 14. Mean income is the simple average of total income within that category; that is, total income divided by number of families or number of individuals as may be the case.

Poverty: Poverty data as reported in this publication are based on a federal inter-agency committee definition of poverty.1/ Factors other than absolute levels of income enter into the calculation of poverty level.

1/ U.S. Bureau of Census, Current Population Reports, Series P-23, No. 28, Revision in Poverty Statistics, 1959 to 1968.

Characteristics taken into consideration include sex of family head, number in family, and residence. According to this definition, the amount of income possible for a family or unrelated individual to receive and still be classified as below the poverty level might range from $1,187 to $6,116, dependent upon the circumstances (Table D).

Family: The census definition is that a family consists of a household head and one or more other persons living in the same household who are related to the head by blood, marriage, or adoption.

## Geographic Areas Covered

Income and poverty data for racial groups are presented in this report for four geographic areas. The most comprehensive are data at the State level.

The 14 Administrative Districts as presented in this report represent the next level of aggregation (Figure 1). These districts were set up by the Office of the Governor for use in state government activities. The 14 districts range from two one-county districts to District 12, which is composed of 5 counties.

The next level of aggregation are the 36 counties in Oregon, which should require little explanation.

The final geographic levels for the purposes of this report are Census County Divisions (CCD's). There are 310 of these divisions subdividing the 36 Oregon counties, ranging from a low of 2 CCD's in Gilliam, Sherman, and Wheeler counties to 21 in Clackamas and 20 in Multnomah counties. In all cases these CCD's are contained within a county; that is, none cross county lines.

CCD's were set up by the Bureau of Census in consultation with state and local officials. In most cases these divisions follow physical features of the county, or limits of incorporated places. In Oregon each CCD has a name which can be related to a major physical feature or some other identifying characteristic of the area it covers. Maps of the CCD's within each county are located with the tables for that county.

It is possible, using Census reports and computer summary tapes, to obtain data on much finer geographic areas, especially in the more populated areas of the state. However, in this report, data were obtained only to the CCD level.

## Source of Data

The information contained within this publication is derived wholly from 1970 Census of Population reports and Census computer summary tapes.

In the spring of 1972 Oregon State University Cooperative Extension Service contracted with the Center for Population Research and Census, Portland State University, to obtain racial income and poverty data for CCD's within Oregon for use in Affirmative Action Plans. These data were arranged into this publication for general use.

Table D. Weighted Average Thresholds at the Poverty Level in 1969, by Size of Family and Sex of Head, by Farm and Nonfarm Residence, United States

| Size of Family | Total | Nonfarm | | | Farm | | |
|---|---|---|---|---|---|---|---|
| | | Total | Male head | Female head | Total | Male head | Female head |
| All unrelated individuals.... | $1,834 | $1,840 | $1,923 | $1,792 | $1,569 | $1,607 | $1,512 |
| Under 65 years..... | 1,888 | 1,893 | 1,974 | 1,826 | 1,641 | 1,678 | 1,552 |
| 65 years and over..... | 1,749 | 1,757 | 1,773 | 1,751 | 1,498 | 1,508 | 1,487 |
| All families..... | 3,388 | 3,410 | 3,451 | 3,082 | 2,954 | 2,965 | 2,757 |
| 2 persons..... | 2,364 | 2,383 | 2,394 | 2,320 | 2,012 | 2,017 | 1,931 |
| Head under 65 years..... | 2,441 | 2,458 | 2,473 | 2,373 | 2,093 | 2,100 | 1,984 |
| Head 65 years and over.. | 2,194 | 2,215 | 2,217 | 2,202 | 1,882 | 1,883 | 1,861 |
| 3 persons..... | 2,905 | 2,924 | 2,937 | 2,830 | 2,480 | 2,485 | 2,395 |
| 4 persons..... | 3,721 | 3,743 | 3,745 | 3,725 | 3,195 | 3,197 | 3,159 |
| 5 persons..... | 4,386 | 4,415 | 4,418 | 4,377 | 3,769 | 3,770 | 3,761 |
| 6 persons..... | 4,921 | 4,958 | 4,962 | 4,917 | 4,244 | 4,245 | 4,205 |
| 7 or more persons..... | 6,034 | 6,101 | 6,116 | 5,952 | 5,182 | 5,185 | 5,129 |

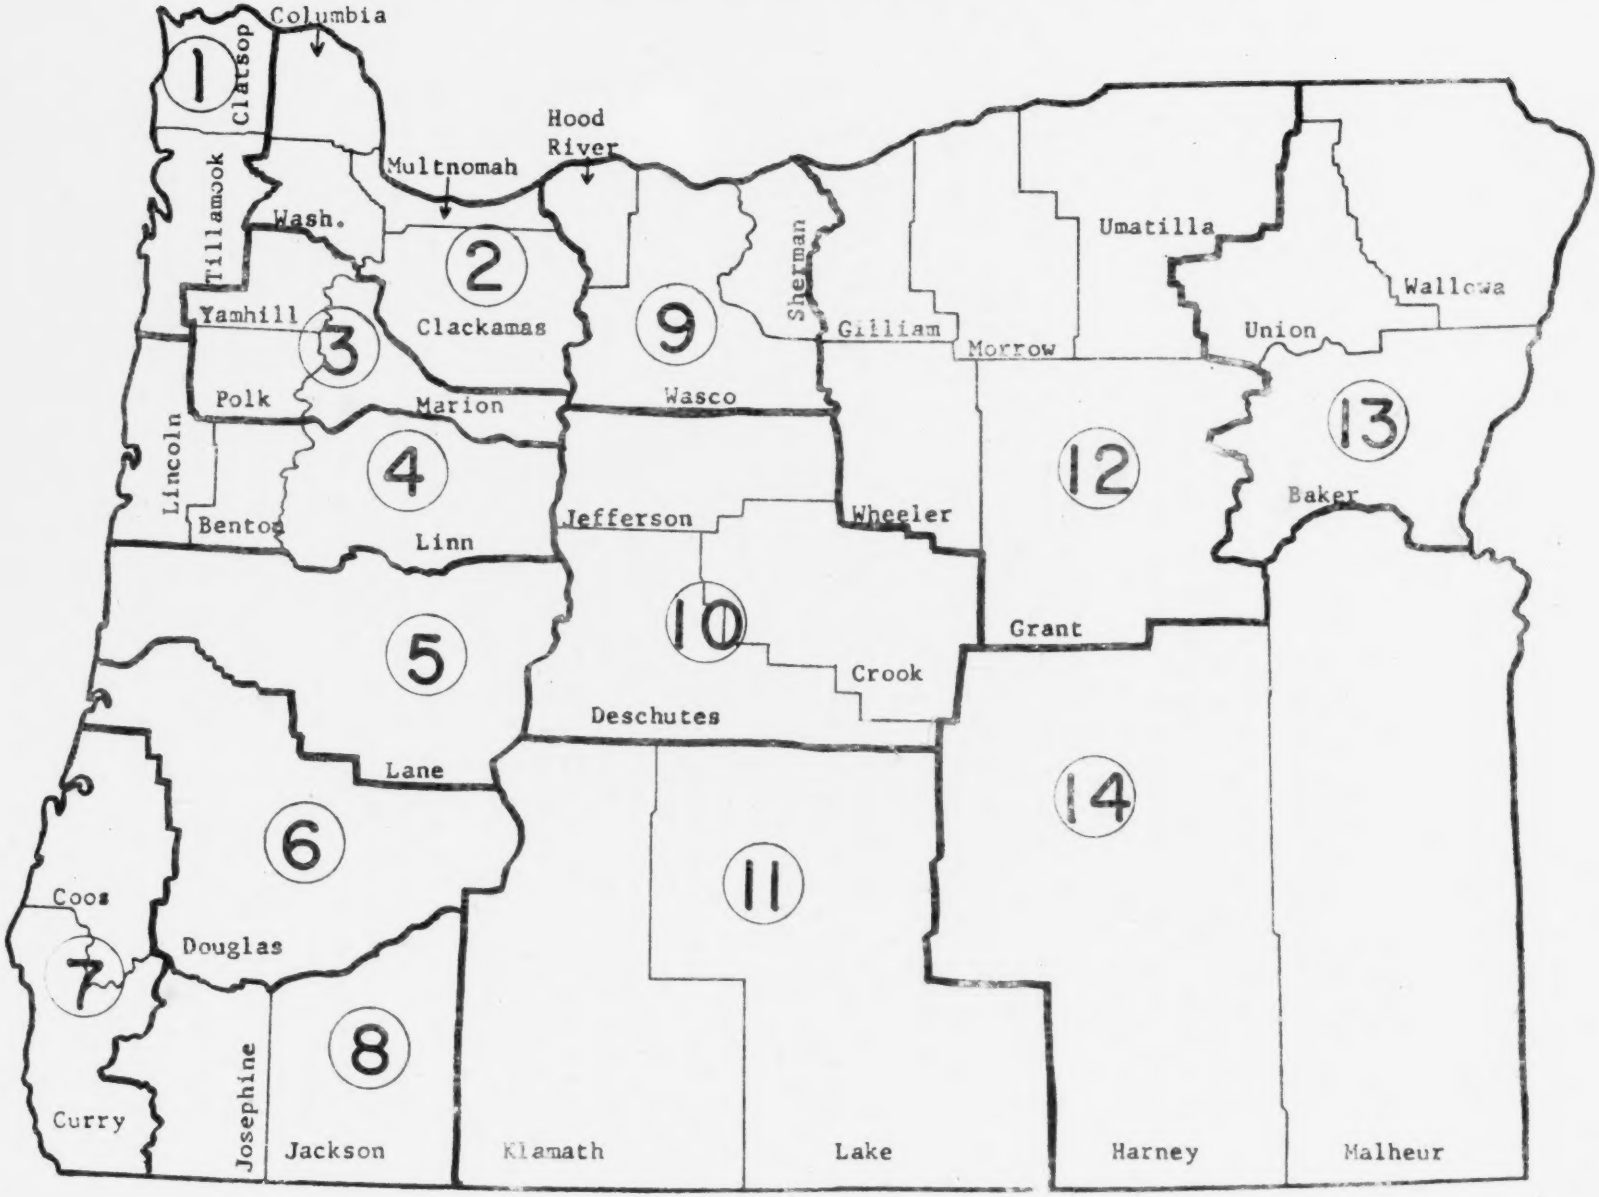
# Figure I. Administrative Districts



Rather extensive use has been made of other printed Census materials.[1/] Portions of the narrative of this report have been taken from appendices and other narratives included within printed Census publications.

Table Format

The format of each table is identical; that is, the left hand stub column is repeated on each page.

The first section of each table gives number of persons by Caucasian, Spanish Language, Black, American Indian, and "Other" categories. Counts are given at CCD, County, and Administrative District levels. Totals and percentages for each race are listed at the County and Administrative District levels.

The table's second section lists mean family income and mean income of unrelated individuals for All races, Caucasian, Spanish Language, Black, and "Other". Figures are given for CCD and county levels, but are not listed for Administrative Districts or the state. Separate income data for American Indians were not available, but are included in the "Other" racial category.

Thirdly, the distribution of families by family income group is given. Families are placed in four income classes: under $3,999, $4,000-$5,999, $6,000-$11,999, and $12,000 and above. Distributions are given for Caucasian, Spanish Language, Black and "Other" racial categories. There are family income distributions at CCD, County, Administrative District, and State levels. Percentages in each income category are presented at County, Administrative District, and State levels.

Finally, each table includes a section of persons and families with incomes below poverty levels. Number of families below poverty levels are listed by race for CCD, County, Administrative District, and State levels. Also, the number of persons in these families is given at these levels. Those individuals below the poverty level but not in families are enumerated at all geographic levels as either under 65 years old or 65 and over.

Male family heads between 14 and 65 years of age with below poverty level incomes are subdivided into employed, unemployed, and not in labor force categories and are given at all geographic levels. Those female family heads in the labor force with income below poverty levels and children under 6 years old are listed at all geographic levels.

The poverty section also includes a limited breakdown of sources of income for those with incomes below the poverty level. Family units and unrelated individuals are added to give totals in each of three income source categories: earnings, social security or railroad retirement, and public assistance or welfare. These categories are listed for all four geographic levels.

---

[1/] U.S. Bureau of the Census, Census of Population: 1970, General Population Characteristics Final Report PC(1)-B 39, Oregon and General Social and Economic Characteristics, Final Report PC(1)-C 39, Oregon. U.S. Government Printing Office, Washington, D.C.

Blank areas within the tables mean either a zero total for that category or a suppression of data. Census information is suppressed where families or individuals in a single category are few enough to identify them and reveal confidential information. Thus, these individuals and families are not included in the income and poverty sections of the tables. This suppression of information together with possible error may result in some small discrepancies between data in this report and published Census data.

## Use and Limitations of Data

The data included within this report can only represent a portion of the necessary background information for someone investigating the sources, conditions, or circumstances surrounding racial groups, income, and poverty in Oregon. One should utilize other sources and other Census publications for a more complete set of background data.

It is possible, using other sources and talking with data experts, to merge Census data with other data to provide a more comprehensive coverage or to update Census information.

The more obvious uses of these data include Affirmative Action Plans. Projects, programs, and Affirmative Action Plans dealing with racial composition, income distribution, and poverty statistics of groups subject to social or economic discrimination require basic data of this nature. Social agencies should also find these data useful in ascertaining the composition of the population in areas where they work. In a similar vein, local and county officials and various community organizations would find their efforts, policies, and programs more effective with better data available to them. The opportunity to provide geographic focus to programs may be of particular interest.

This report is intended to give detailed information of a selective nature. Thus to investigate the total set of circumstances, for instance, surrounding the Black population within Oregon and within the Census County Divisions of the state, other sources should be used. For example, this report may show a number of Blacks in a certain CCD. If other Census reports are used, it may be discovered that most Blacks within that particular CCD are living in group institutions. These Black residents of that Census County Division may be living in a Job Corps Center, attending a community college and living in a residence hall, or other such unique circumstance.

Another example of the value of using all possible data sources would be for occupation. One might surmise from the stereotypes so often portrayed that persons of Spanish Language within a certain county or CCD are low income farm laborers. Checking with other Census publications or other sources might reveal that these people are instead professionals, skilled operatives, farm owners, clerks, and other such occupations which may have little or nothing to do with agriculture.

Since the data were collected in April, migrant workers in the state only during the summer months are excluded from this report. Also, seasonal workers looking for employment in April are simply listed as unemployed although they may normally be out of work in April but employed later in the season.

It is possible to find within a county two CCD's side by side with totally different characteristics for a given racial group. For instance within one CCD perhaps most Blacks have relatively low incomes. The CCD immediately adjacent might have a large portion of high-income Blacks. Averaging these two divisions together presents a distorted picture of the county. For example, mean incomes for Black families in Multnomah County range from $2,950 in the Rockwood CCD to $13,700 in the Gresham CCD, while the county mean income for Black families is $8,131.

Some analysts might find it easy to generate many misleading "conclusions" from a single report. It is for this reason that all possible sources should be checked to ascertain the true character of the population. Any one report cannot be relied on to yield all necessary information. Once a person has checked with all available printed reports, there is still the knowledge of people within the county who deal with these people, work with them, and know them. This final source can yield finishing touches to any analysis.

Table 1. Income and Poverty Data for Racial Groups, by Oregon Administrative Districts

| Item | | Administrative District | | | | |
